

Whiskers: most extreme observations within 1.5 × IQR of the box. All outliers are shown.
95% CI: within-run percentile bootstrap, B=2000, seed=42.
8 records: 100 attempts, 0 errors; 40 records: 100 attempts, 0 errors; 80 records: 100 attempts, 0 errors.
Warm-up excluded; successful calls shown. Synthetic replicated inputs, one scoring implementation.
Within-run CI assumes independent calls and does not capture between-run variability.
